

It's Not Always Quiet on the Farm!

Sound is measured in decibels (dB). Sounds at or above 85 dBA* can cause hearing loss. The louder the sound, the quicker it can damage your hearing.

Sort the sounds into the correct columns.

grass moving	combine	teacher speaking	soft whisper	raking leaves	air compressor
tractor cab	pigs squealing	horses chewing	whipper snipper	lawnmower	chickens clucking

Over 85 Decibels (6)	Under 85 Decibels (6)

What are the ways that you can protect your hearing?
